

IBERSENSOR 2008

6th Ibero-American Congress on Sensors

November 24th – 26th, 2008 –São Paulo, BRAZIL

Deadline Extension!

Extended Abstract Deadline: June, 6th, 2008

The Polytechnic School at University of São Paulo, and the IBERSENSOR Permanent Committee are pleased to invite researchers, students and professionals who work in the sensors and biosensors fields to participate on the **6th Ibero-American Congress on Sensors, IBERSENSOR 2008**, which will take place at **São Paulo, Brazil, Morumbi Blue Tree Towers Convention Center**, November 24th - 26th, 2008.

IBERSENSOR is a forum of the Spanish and Portuguese speaking scientific community, working in the fields of development of sensors of every kind and their applications. This conference series has already been successfully carried out in five occasions: the first edition took place at Havana, Cuba in 1998, the second at Buenos Aires, Argentina in 2000, the third at Lima, Peru in 2002, the fourth was at Puebla, Mexico in 2004, while the fifth was at Montevideo, Uruguay in 2006. Steady progress and growth of these meetings has contributed to unleash the potential of our community countries in this field, which constitutes one of the most significant and fast developing branches of the scientific and technical tasks on a worldwide scale.

An exhibition dedicated to Instrumentation and Sensor Industries will take place in a contiguous room during the congress.

Invited conferences and accepted contributions on original research works shall cover (non-exclusively) the following fields of interest:

- * Chemical-, mechanical-, optical-, electrical-, magnetic-, thermal-, optical-, ultrasonic sensors
- * Nanosensors
- * Intelligent Sensors & Wireless networks
- * Microfluidics and MicroAnalysis Devices
- * Sensor Microsystems
- * Materials, fabrication & packaging techniques for sensors
- * Sensor signal conditioning and Instrumentation
- * Applied signal-and image processing for sensors
- * MEMS and actuators
- * MicroPower Generation
- * Environmental applications
- * Medical & point of care applications
- * Industrial applications
- * Agro-industrial and food industry applications
- * Biological and biomedical applications

Information for extended abstract submission

Prospective authors are requested to submit an extended abstract of their works in **two A4-size paper (210x297mm)** with at least 2 cm margins on all sides and at least 10 point type font. Extended abstracts may be written in **Spanish, Portuguese or English**, and should be sent in PDF format to abstract@ibersensor.org.

Authors are also solicited to specify their preference for presentation in oral or poster sessions, as well as to specify at least one of the fields above to which the work is related. If the principal author is a student please specify if the paper will participate in the best student paper award.

Please, include complete author's contact information: author name, affiliation, complete address, telephone and e-mail address.

Information for complete paper submission

When notified about acceptance, authors will be requested to submit a copy of the final, complete work. All papers accepted for presentation at the 6th Ibero-American Congress on Sensors (Ibersensor 2008) will be published in the form of CD Conference Proceedings. Best papers of each session will be published as a supplement in an indexed journal (to be announced). A guide intended to assist authors in preparing their final manuscript will be available at the conference website (<http://brasil2008.ibersensor.org>).

Other important information

Extended Abstracts submission must be made via electronic mail to abstract@ibersensor.org.

Extended Abstracts Submission Deadline: Friday, June, 6th, 2008

Notification of Acceptance: Friday, July, 21st, 2008

Full Paper Submission Deadline: Monday, August 25th, 2008
